

## Practice 1

### 1. Download and setup Visual Studio Code.

Link download: <https://code.visualstudio.com/download>

#### a) Guide to running a html file.

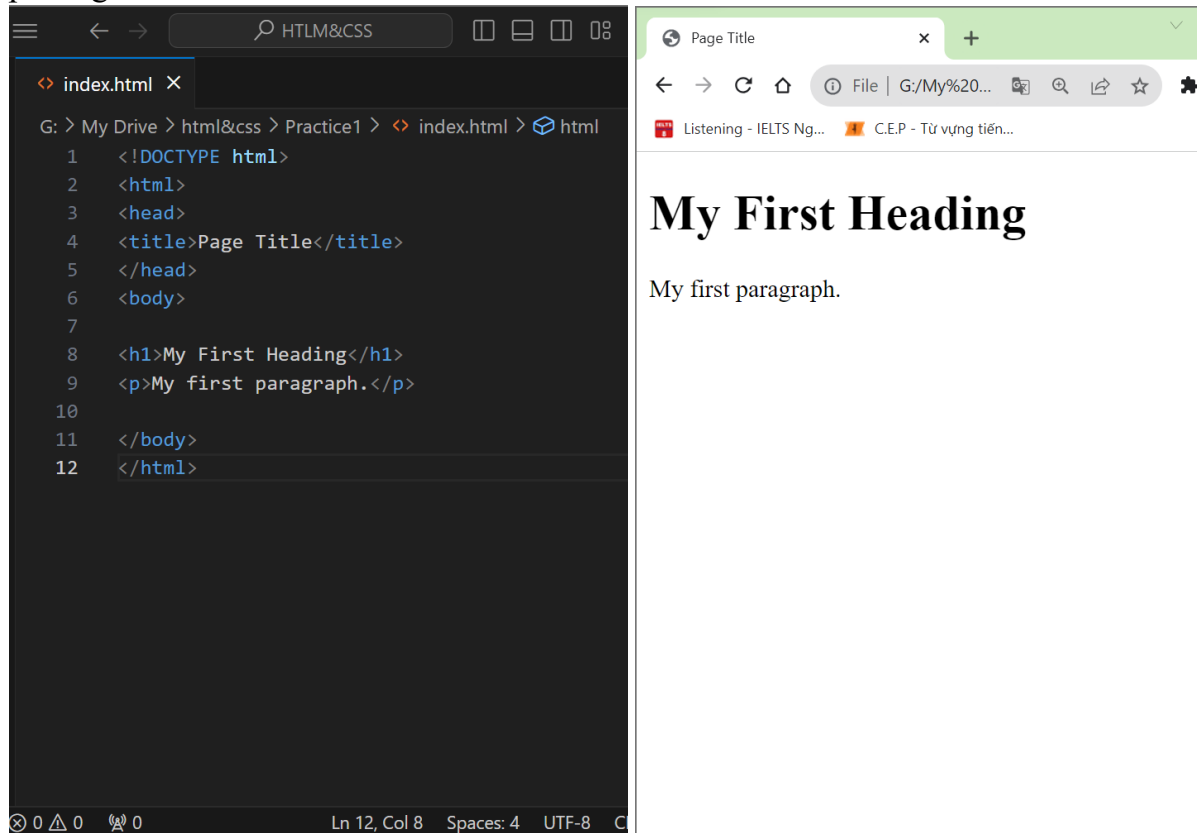

Create a new folder -> Create a text document file with .html extension (Example: index.html)

Open index.html with Visual Studio Code

#### b) Create HTML Page Structure and run file html

Create HTML Page Structure in index.html file:

Copy link in a saving folder (Example: G:\My Drive\html&css\Practice1\index.html) then pasting in Web browser.

### 2. Setup the basic tags

#### a) Problem 1: HTML tags format text

Instructions for using some basic format tags:

In <head> tag: Use <title> </title>, <meta> tags

In <body> tag: use <p>, <div>, <h1>, <h2>, <b>, <i>, <u>, <strike>, <sup>, <sub>, <del>, <big>, <small>, <span>

Text:

Hello Beginner!

Welcomer to The HTML formatted text of the tags

The HTML formatted text of the tags is dedicated to providing you with:

This text is in Bold.

This text is in Italic.

I want to put a mark on this document

This text is underlined.

The following text is strikethrough.

$AX^3+BX^2+CX+B=0$

H<sub>2</sub>O

Delete a piece of text.

Hello The text has large font.

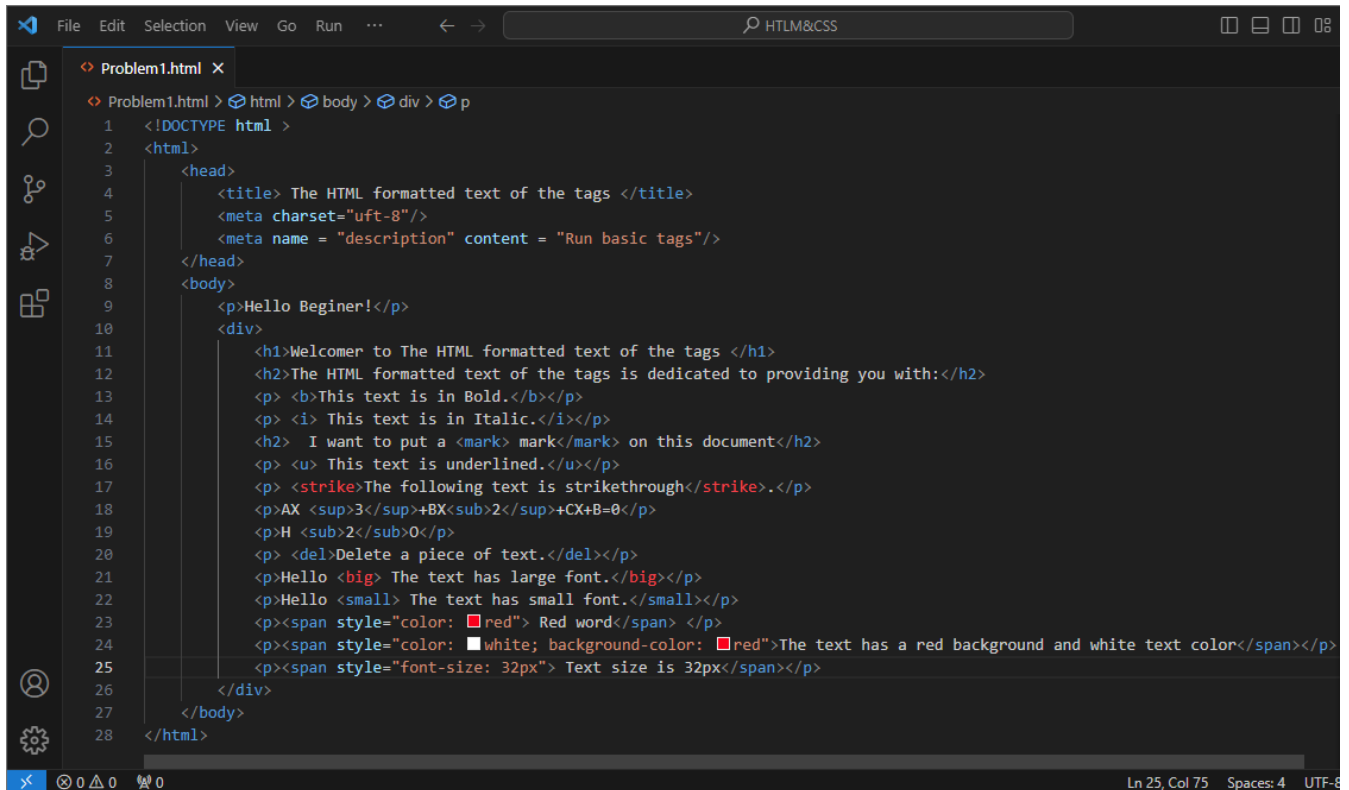

Hello The text has small font.

Red word

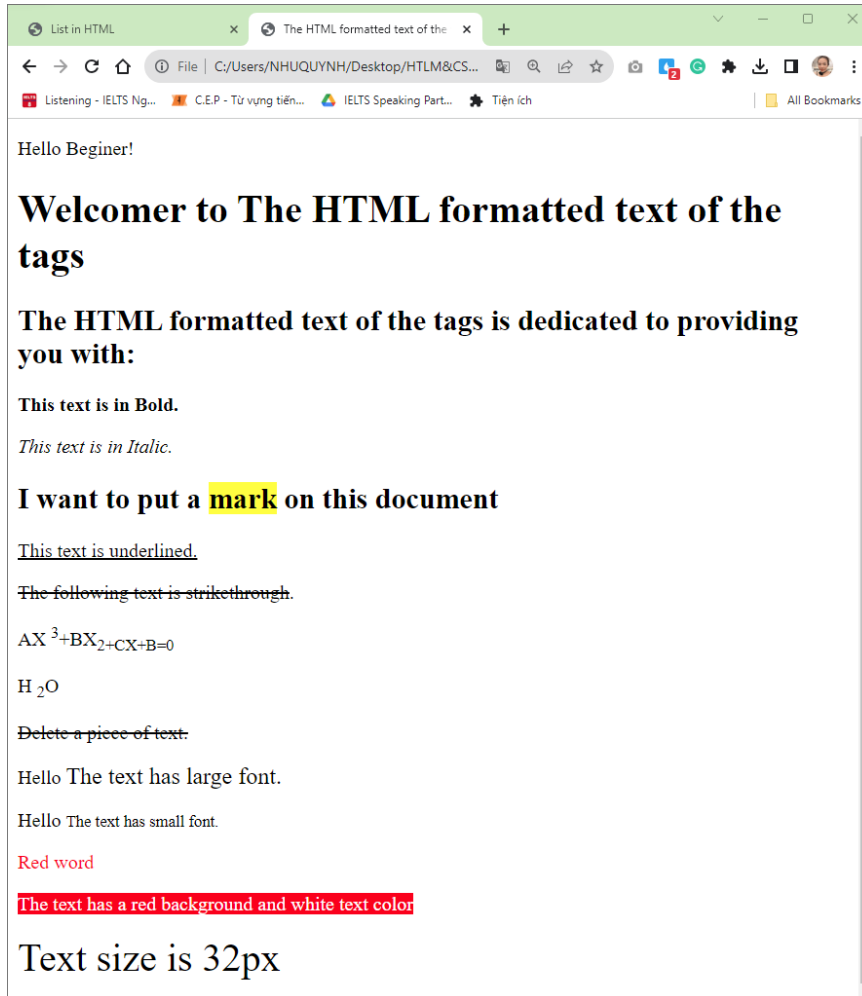

The text has a red background and white text color

Text size is 32px

Example code:

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title> The HTML formatted text of the tags </title>
5     <meta charset="uft-8"/>
6     <meta name = "description" content = "Run basic tags"/>
7   </head>
8   <body>
9     <p>Hello Beginner!</p>
10    <div>
11      <h1>Welcomer to The HTML formatted text of the tags </h1>
12      <h2>The HTML formatted text of the tags is dedicated to providing you with:</h2>
13      <p> <b>This text is in Bold.</b></p>
14      <p> <i> This text is in Italic.</i></p>
15      <h2> I want to put a <mark> mark</mark> on this document</h2>
16      <p> <u> This text is underlined.</u></p>
17      <p> <strike>The following text is strikethrough</strike>.</p>
18      <p>AX <sup>3</sup>+BX<sub>2</sub>+CX+B=0</p>
19      <p>H <sub>2</sub></p>
20      <p> <del>Delete a piece of text.</del></p>
21      <p>Hello <big> The text has large font.</big></p>
22      <p>Hello <small> The text has small font.</small></p>
23      <p><span style="color: red"> Red word</span> </p>
24      <p><span style="color: white; background-color: red">The text has a red background and white text color</span></p>
25      <p><span style="font-size: 32px"> Text size is 32px</span></p>
26    </div>
27  </body>
28 </html>
```

b) Problem 2: Designing a simple content website requires

the use of the below tags: <meta>; <title> </title>; <h1> </h1>; <h2> </h2>; <p> </p>

Using the tags: <meta>; font format tags: <u>, <i>, <b>; alignment tag: <center>; tag

<br/> (<br/> Tag: br breaks a line of text, this tag places the last line that needs a line break)

Text:

“Lesson 1: Using basic tags.

1.1. Learn basic function tags.

HTML tags contain 3 main components: opening tag-content-closing tag, but there are several tags that both open and close.

Syntax: Tag name [Attribute] - Affected element - Tag name

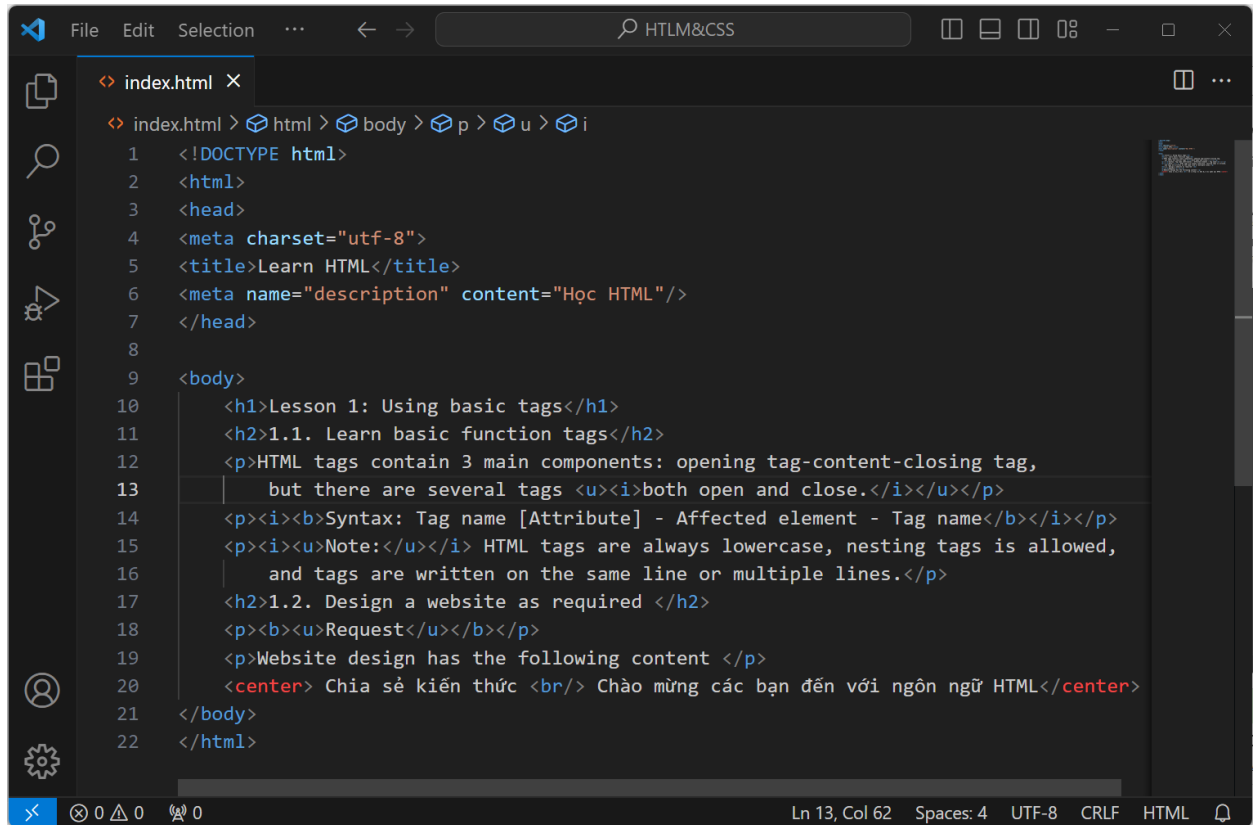

Note: HTML tags are always lowercase, nesting tags is allowed, and tags are written on the same line or multiple lines.

1.2. Design a website as required.
